

July 2024

Dumbleton Conservation Society Wildlife Wanderings

Enjoy the company of Anne Goodenough, Professor of Applied Ecology at the University of Gloucester on two more events in 2024.

Moth Hunt 13th July 8:30-9:30am

Please note there is **no walking involved in this event and is suitable for anyone with limited mobility**

Anne will prepare for the event the evening before by placing moth collectors in the area around the Village Club. A moth collector attracts moths by light and keeps them safe for us to identify and release the next morning. There are over 4000 species in the UK, and it is possible to collect 100s of moths in one night during the June peak moth time.

Meeting point:
Village Club Car Park, 8:30am

Bat Walk 6th or 7th Sept 7:30pm

Following last year's highly successful event, Anne will host another Bat Walk in 2024. We will decide which day is best based on the weather forecast and could do both days if the weather is kind. We start at 7:30pm for an initial talk and then a walk of up to 1½ hours and 1½ miles.

With at least 11 of the 17 UK species breeding in the area, we anticipate another very interesting evening!

Meeting point:
Village Hall, 7:30pm

How to book a place: All events are free. Spaces for all events are limited to a maximum of 20, for all ages, inc. children accompanied by an adult. We will hold a waiting list and run further events, where we can.

Simply email peterst1607@gmail.com with names of the participants.
